

Stream Filtration UV Systems come assembled on a wall mounted bracket and consists of a 20" sediment filter, stainless steel tubing, connectors and ultraviolet sterilizer. These UV assemblies are for sterilizing the entire water supply for your home with flow rates of 8gpm to 13 gpm at 40,000 mj, The system is equipped to inactivate microorganisms and parasites such as Cryptosporidium and Giardia, harmful bacteria like E.Coli, coliform and viruses not visible to the naked eye

- Easy to maintain and service with easy lamp and cartridge replacement and quick disconnect fittings
- UV lamp can be changed without interrupting the water flow and comes equipped with a connector that allows for easy removal of the lamp without any special tools
- Built with a durable stainless steel chamber to prolong life and eliminate ultraviolet light degradation
- Equipped with a 20" 5-micron sediment pre-filter to reduce particles in the water
- High flow polypropylene filter housings with 3/4" or 1" full flow connections.
- Solid steel powder coated mounting bracket, compact design
- High flow rates
- Environmentally friendly
- No harmful chemicals
- Long life coated Ultraviolet lamps
- Passivated and polished stainless steel chambers
- Electronic ballast controller includes both visual and audio lamp failure alarms
- 99.9999% destruction of bacteria, virus and protozoan cysts (Giardia Lamblia and Cyryptosporidium)
- 3 year warranty except consumables
- Product certified by CSA and CE
- True lamp current closed loop current control
- Annual lamp change timer
- Domed quartz sleeve for easy service
- No tools required for regular servicing
